

Expanding Our Team

CONCEPTS AV Integration recently welcomed Jason Muehlhausen to our team of AV professionals.

Jason joins our team as a sales representative with over 13 years of experience in AV sales. He will be operating out of Lincoln, NE and has already made an impact in the area with quality AV solutions.

CONCEPTS welcomes the growth of our team with the added expertise of Jason. We are confident that our new addition will help us improve service to our clients and enable us to take on more business in the future.

CONCEPTS Accomplishments

We are proud to announce that system programmer Horton Simons and senior installation technician Eric Porter have completed the Extron A/V Associates Certification program. The ongoing training and education of the CONCEPTS' team is one of our highest priorities and ensures the best possible service for our clients.

Congratulations Horton and Eric!

The Perfect Projector for any Space

Sanyo PDG DWL2500

Create a big impact no matter how limited the space with an ultra-short throw multimedia projector. Sanyo's PDG DWL2500 ultra-short throw projector gives an 80 inch image from only 3 inches away making it the perfect solution for almost any size room.

It can be placed on a tabletop or mounted to a wall or ceiling making it ideal for presentations and lectures in an educational or professional setting. The short throw distance allows the projector to be positioned behind the presenter for more polished and effective message delivery while minimizing distortion and focus issues.

Enhancing VTC with Peripherals

VTC is a great way to save businesses time and money while maintaining and improving the impact of the presentation with peripherals. Since CONCEPTS has a full service rental department on site our VTC facilities enable clients to incorporate everything from digital presenters and recorders to flip charts and white boards.

Peripherals enable clients to share printed documents, create accurate digital records, show PowerPoint presentations and improve overall communication. If you are interested in learning how peripherals can enhance your VTC experience our associates
